TOOLTIPTUESDAY

THEHARVESTER

PROTOVOID

# INTRODUCTION

> theHarvester (purposely spelt that way) is a python based CLI OSINT tool

> It allows for multiple searches off a single command

> theHarvester utilizes API keys to expand on the searches

INSTALLATION

> theHarvester is pre-installed on multiple penetration testing systems such as Kali Linux and the like

> If your machine does not have it check out the GitHub page for further instructions (linked in the YouTube description)
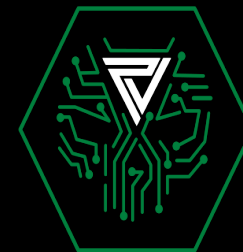

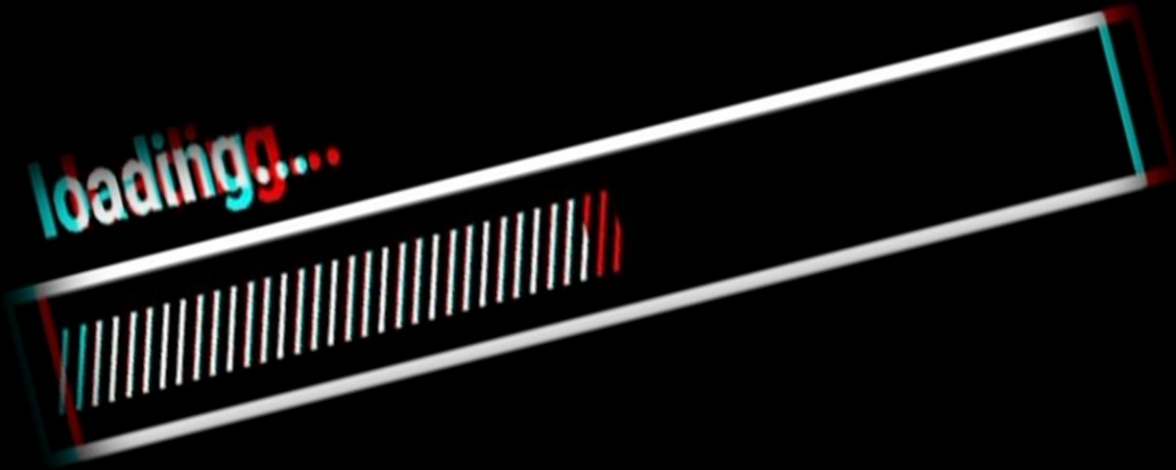

API'S

> theHarvester utilizes API's or an Application Programming Interface

> The API allows a program to connect to an application and utilize its functionality

> Most are free however they may have a daily or monthly limit of use
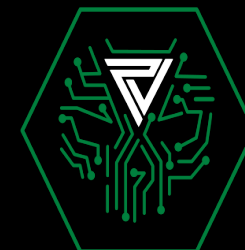

API'S (CONT.)

> The following are the required API keys

> Visit the websites/google to find out how to get an API key

> binaryedge - not free

> bing

> censys - API keys are required and can be retrieved from your Censys account.

> fullhunt

> github

> hunter - limited to 10 on the free plan so you will need to do -l 10 switch

> intelx

> pentesttools - not free

> projecdiscovery - invite only for now

> rocketreach - not free

> securityTrails

> shodan

> spyse - not free

> zoomeye

USE

```

*****************************************************************
```
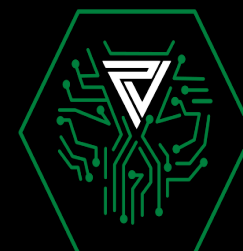

> Mainly used in
business/website OSINT

> However it is still a good tool
to learn
